

Align-Pilates

Catalogue 2024

Who We Are

Align-Pilates was founded in 2010 with the objective of making commercial quality Pilates equipment more affordable outside North America, so that Pilates Studios could flourish in other parts of the world as they have there. Setting up your own successful Pilates Studio has always been an exciting prospect – Align-Pilates' mission is to make this a more viable and profitable prospect whilst offering innovative, high performance, reliable equipment that you and your customers will love.

Our Experience

Align-Pilates have been producing our own apparatus for fourteen years with our sister brand, Pilates-Mad. Pilates-Mad have been the UK's leading Pilates matwork equipment brand since 2001. With the extensive Pilates knowledge of its customers, Align-Pilates has created Europe's own Pilates apparatus company. Align-Pilates is pleased to present its latest evolution of Pilates apparatus, which blends tried and tested reliability with rapid, customer led design refinements.

Our Service In The UK

When it comes to service, we stand alone amongst the Pilates apparatus brands in the UK. We hold all of our products in stock, together with an extensive range of spares and accessories in our own warehouses. We offer a complete delivery and install service using our own staff and vehicles and we are open throughout the UK working week to handle your enquiries as and when they arise. These are simple things in themselves but take them away and it can play havoc with the smooth running of your Pilates business! Outside the UK, we appoint stocking Distributors so that you can receive a similar service wherever you buy from.

Try Our Apparatus In The UK

With Pilates apparatus there is nothing like experiencing the equipment first hand and finding out what it is really like. We actively encourage visits to our showroom at our UK headquarters, which is open in normal office hours – please just let us know when you want to come! We also regularly attend Exhibitions and Shows – check the link on the back cover for upcoming events.

Try Our Apparatus Outside The UK

Align-Pilates has a growing following around the world with Distributors in Australia, Canada, Costa Rica, China, Denmark, Finland, France, Germany, Greece, Hong Kong, Hungary, Ireland, Israel, Italy, Malaysia, Netherlands, Poland, Romania, Saudi Arabia, Slovakia, Slovenia, South Korea, Spain, and Thailand, with more being added all the time. Many of our Distributors have permanent showrooms where you can try the equipment. Please see the link on the back cover of the catalogue to find a Distributor or International trade show near you.

Home Warranty

A8-Pro

The Align-Pilates A8-Pro Pilates Reformer is our flagship commercial Pilates Reformer.

The A8-Pro runs on 8 PU wheels, which creates an extremely smooth and quiet ride, improved handling of cross loading forces, and reduced maintenance.

The A8-Pro includes our patent-pending Rapid Change Spring Bar, which allows swift and hassle-free spring bar adjustments. With a focus on efficiency, you can change the carriage position

without removing any springs. Additionally, we have introduced a new and improved rope adjustment system that enables precise adjustments. With this conveniently located near the headrest, you can effortlessly fine-tune the rope lengths to achieve optimal positioning for you or your clients. We understand the importance of seamless and accurate adjustments, particularly in a Studio setting where time and precision are paramount.

Our A8-Pro offers refined performance, extensive adjustability but importantly it offers a luxurious oversize carriage and the longest travel of any standard Pilates Reformer on the market. Simply, this Reformer has been designed for those seeking a spacious carriage bed either for yourself, or for a breadth of clients in a Studio setting.

Now in its fourth generation, the A8-Pro is the result of over eight years of development. The A8-Pro can be built with a choice of 3 interchangeable leg heights:

Low Leg (28cm), Standard (42cm), or High Legs (64cm), making the A8-Pro a truly future-proof and versatile investment. The A8-Pro has been designed for studio, rehab, and private use with the innovative design offering a host of easy adjustments to provide complete flexibility. The A8-Pro uses all the same accessories as the previous A2 models so that the A2 and A8-Pro can easily coexist in the same studio, sharing Jump Boards, Mattress Converters, and Platform Extenders.

A8-Pro

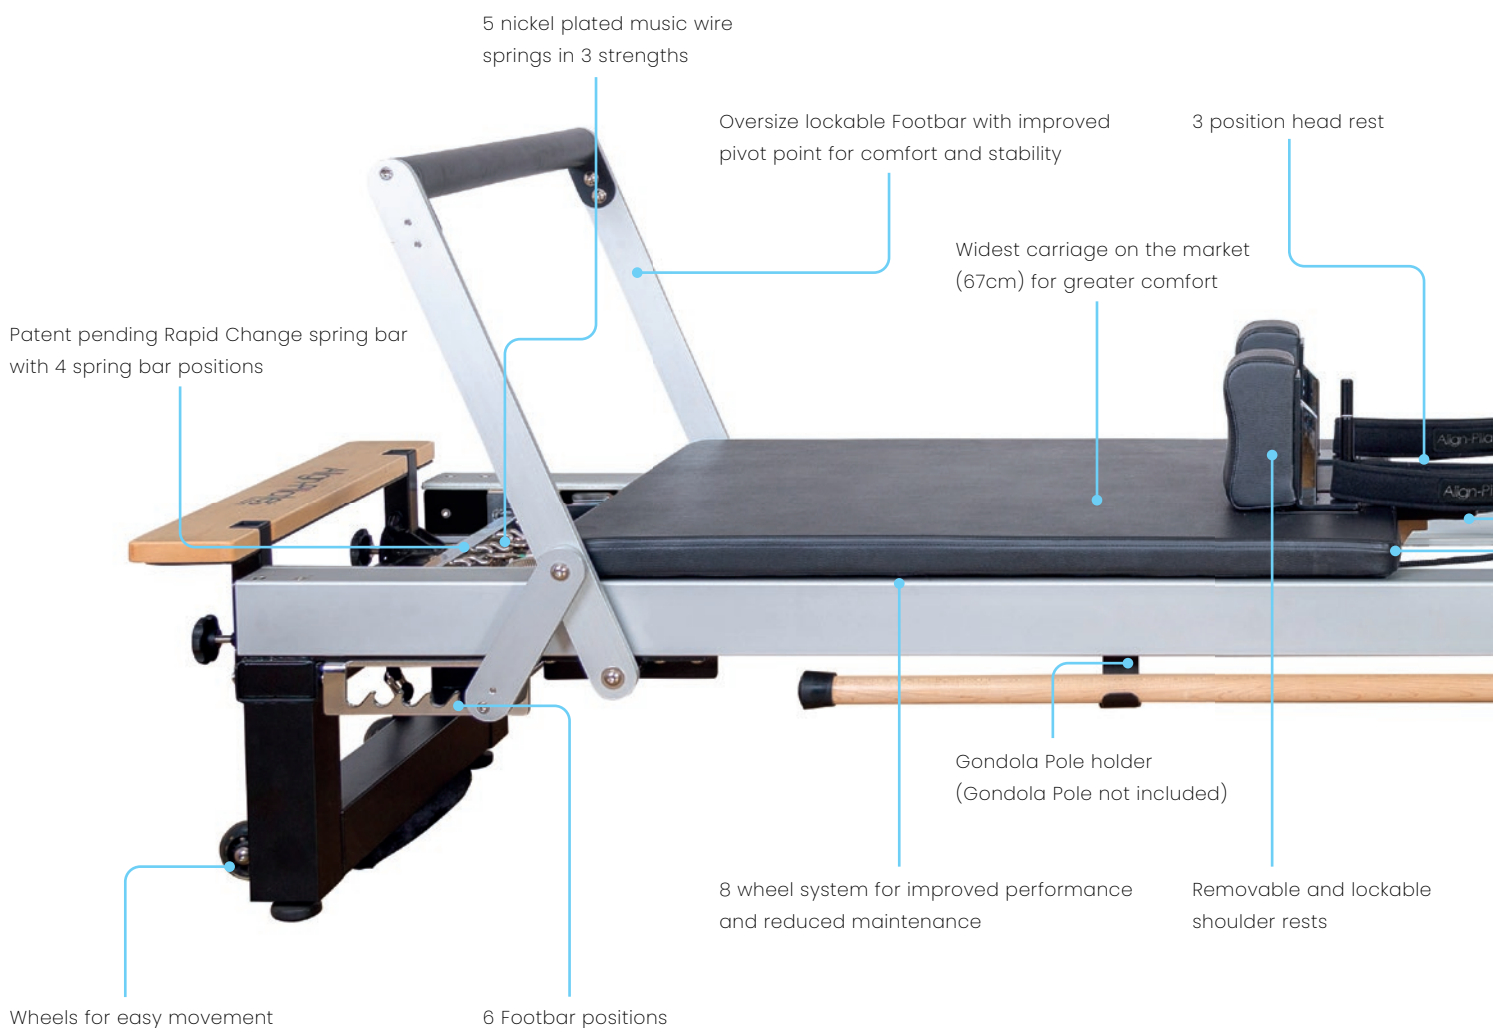

What's Included?

- Adjustable Silent Foot Strap with fluffy cover
- Integral standing platform
- Pair of Silent Double Loop Straps
- 5 nickel plated quality music wire springs in 3 different strengths: 2 × light, 2 × medium and 1 × strong

A8-Pro

C8-Pro

The C8-Pro is the ultimate C-Series Reformer, featuring an oversize aluminium profile and Footbar and an 8 PU wheel carriage system for the quietest and lowest maintenance ride available.

Like all Align-Pilates commercial Reformers, the C8-Pro features our patent pending Rapid Change (RC) spring bar for the easiest and quickest adjustment on the market.

Many Pilates professionals choose their Reformer based on the ride characteristics and the biggest determinant of that is the number and type of wheels. The number and material of the wheels determine the resistance of the carriage, the sound the machine makes, the handling of cross loading and the amount of maintenance required. The C8-Pro uses 8 'roller blade style' wheels which are designed to give a quieter and softer ride with greater rolling resistance.

Among other premium Reformers, the C8-Pro has the advantage of versatility: Its size provides a comfortable range of motion to suit a variety of clients but is also easy to move, stack, or stand — and is our only Reformer which can accept both a Full and Half Cadillac. This makes it perfect for a multifunctional studio which needs to offer a variety of classes within a single space.

The C8-Pro's Rapid Change spring bar radically alters the ease and speed of adjusting your Reformer, which is particularly beneficial for those running group classes (where the C8-Pro really excels). The spring bar can simply be adjusted with the springs attached, with one hand, and in a single action, which saves up to 12 additional actions when compared with most standard spring bars.

C8-Pro

C8-S Pro

The C8-S Pro is an evolution from our best-selling C8-Pro Reformer. Designed with a focus on aesthetics and neat-flowing lines, the C8-S Pro Reformer is perfect for more style oriented Studios.

The C8-S Pro takes the design of the C8-Pro and repackages it in a fresh design with a focus on clean flowing lines, achieved by bringing the standing

platform and rope risers within the frame. The C8-S Pro is particularly aimed at the group Reformer studio and more style-oriented home studio.

The C8-S Pro is operationally almost exactly the same as the C8-Pro, using the same carriage, runner profile, running gear and adjustment systems so you can expect the same smooth and silent user experience

here. For owners of existing C-Series Reformers the C8-S Pro also uses the same Jump Board, Mattress Converter, and Platform Extender. The C8-S Pro comes in a standard height of 26cm which can be raised to 42cm with its optional, almost seamless Leg Extensions.

The differences with the C8-Pro are: 1.5cm less carriage travel (but still an excellent 105cm); very similar but fractionally different Footbar positions; white frame and legs; different Leg Extensions and the inability to have the Full Cadillac attached. On the plus side it looks great and functions beautifully!

C8-S Pro

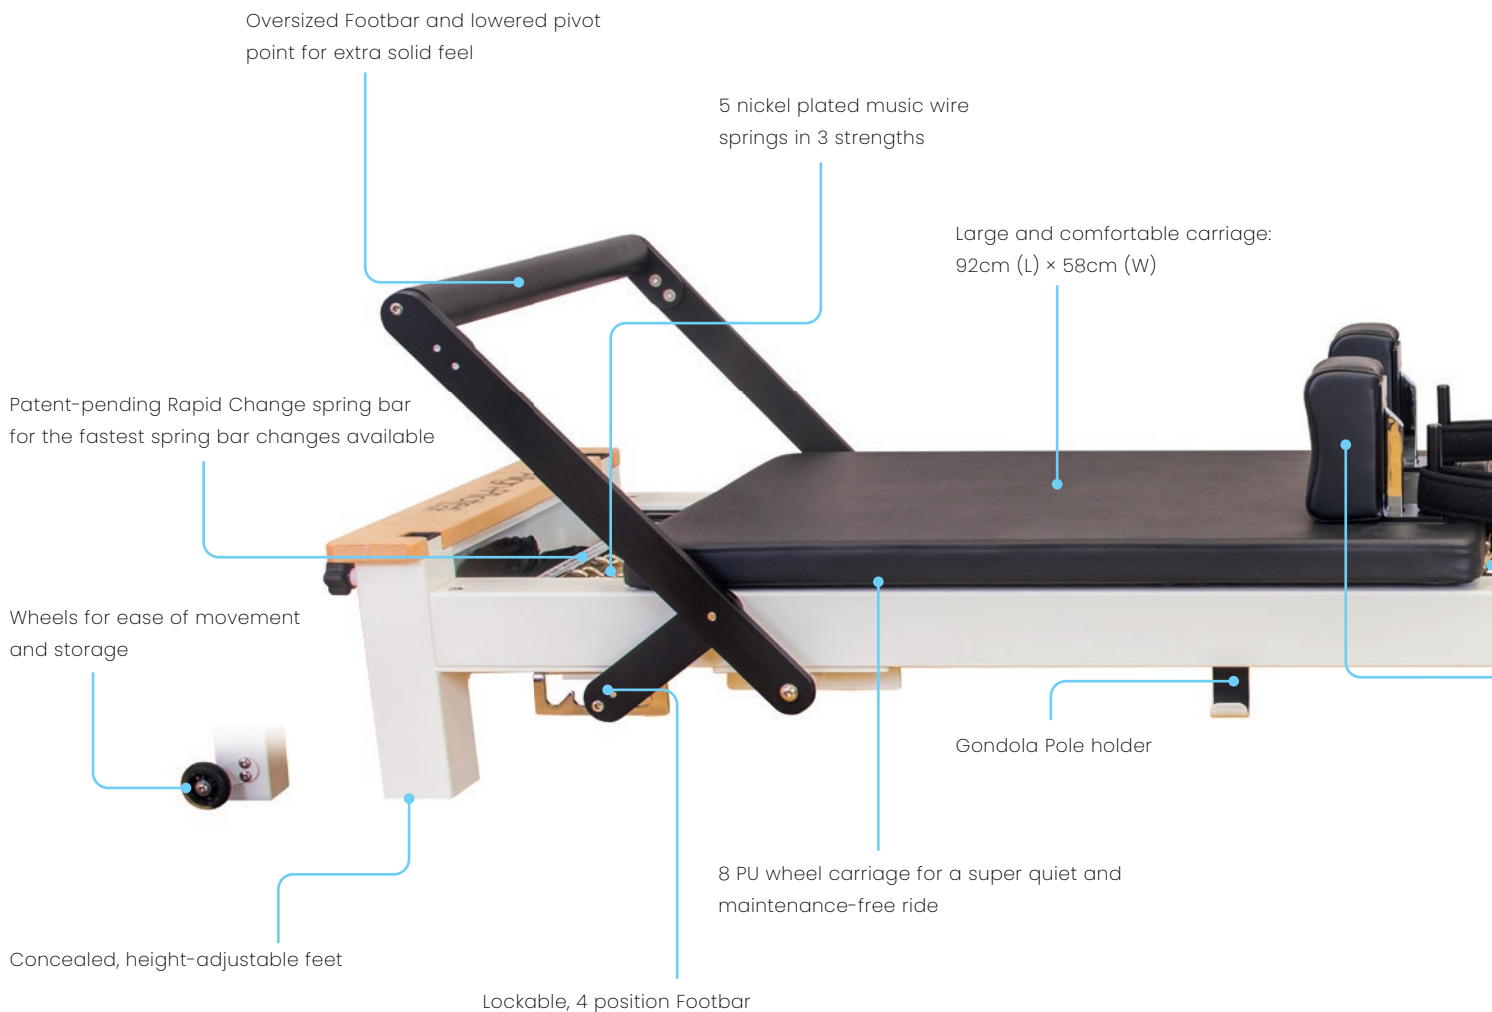

What's Included?

M8-Pro

The Align-Pilates M8-Pro Pilates Reformer is crafted from extremely durable North American maple and designed to marry classical styling with contemporary functionality.

The M8-Pro offers refined performance, whilst offering extensive adjustability, a luxurious oversize carriage, and 104cm of smooth and silent travel. Not only does the M8-Pro deliver outstanding performance with its 8 wheel carriage, but its sleek design and attention to detail make it a visually appealing addition to

any home or studio. The oversized carriage on the M8-Pro easily accommodates a range of body sizes, meaning it not only looks fantastic in one's home, but can accommodate a breadth of clients too in a Studio setting. The innovative design offers a host of easy adjustments to provide complete flexibility in use.

The M8-Pro uses our patent-pending Rapid Change (RC) spring bar, which can be adjusted – with the springs attached – with one hand, without needing

to move a separate carriage stopper. This radically alters the ease and speed of adjusting your Reformer, which is particularly beneficial in a group class environment.

Unlike any other Reformer in our range, the M8-Pro Reformer comes complete with a Pro Sitting Box and Foot Strap. It also comes with a removable maple standing platform which is larger than our other commercial Reformers in our range. It also now features storage hooks for a gondola pole (available

separately) and removable off-centred shoulder rests for a choice of shoulder width positions.

The M8-Pro is incredibly adaptable, with an upholstered Jump Board also available, which is interchangeable with the standing platform. The M8-Pro can also accept a Half Cadillac, converting it into a completely flat bed with a two-part Platform Extender/Mattress Converter.

R8-Pro

The R8-Pro is our new entry level light commercial Reformer, available in black or white finish.

The R8 stands for Retro (8 wheel) as the Reformer has been designed to replicate many features of Joseph Pilates's original "classic Reformers". This includes the carriage and Footbar distances, carriage dimensions, spring bar positions, Footbar height, and Reformer height. Whilst the R8-Pro uses height-adjustable rope risers and our Silent Ropes instead of leather straps, the design ensures the pulley position closely resembles that of a classic machine.

Despite these classic features, the R8-Pro is a contemporary Reformer which has been designed with 4 Footbar heights, including a flat position and many rapid adjustment systems.

The R8-Pro comes with 4 springs, but uniquely has the space to add a 5th spring should you wish. It also includes our patented Rapid Change spring bar with 3 Spring Bar positions for quick and seamless carriage position adjustments. The R8-Pro ropes can also be quickly adjusted using our Pro Rope adjusters that conveniently sit behind the shoulder rests.

The R8-Pro is our first Reformer in a “light commercial” category, meaning it’s ideal for both home studios or those commercial set ups with light usage. For a full list of differences, please refer to our Reformer Comparison on our website, but please note that this Reformer cannot accommodate a Half Cadillac Tower.

This is an incredibly compact Reformer which does not sacrifice on quality or performance. You can free-stand the R8-Pro with an optional Jump Board, and it is portable too with wheels to reposition or move,

meaning it’s a great choice for a multi-purpose Studio.

Overall, the R8-Pro is the best value light commercial Reformer on the market. Its appreciation of classic Pilates Reformer geometry – combined with ease of use, longer travel, and a wider range of adjustments to suit different body shapes and sizes – makes this a great all round Reformer and a modern take on a classic theme.

R8-Pro

What's Included?

- Integral standing platform
- Pair of Silent Double Loop Straps
- 4 nickel plated quality music wire springs in 3 different strengths: 1 × light, 1 × medium and 2 × strong (with space for a 5th spring)

F3 Folding

The F3 Folding Pilates Reformer takes the world's most popular folding Reformer, the F2, to new heights with a completely revised carriage and the introduction of aluminium runners for an even smoother ride.

The F3's innovative carriage never crosses the folding joint so in use you cannot even tell you are using a

folding Reformer, whilst the new aluminium runners offer reduced weight, an extremely smooth ride and a 2cm increase in travel to 97cm.

The F-Series was developed to bring the benefits of a Pilates Reformer workout into your home, without the need to have a dedicated space. The F3 features the same high quality springs found in our commercial

Reformers — though there are four springs instead of the standard five. The spring choice being 1 × Light, 1 × Medium, and 2 × Strong ensures the F3 offers ample versatility and progressive resistance.

The most unique feature of the F3 Folding Pilates Reformer is that it folds up in a matter of minutes into a compact and self-contained machine. The F3

design enables easy mobility and storage, making it an ideal choice for those seeking a home Reformer without sacrificing the key features found on Reformers found in a studio setting. The wheels at the base of the Reformer also means you can effortlessly wheel it around and store it securely out of the way, maximising the use of space in your home.

F3 Folding

Half Cadillac

Our Half Cadillac, also known as a Half Trapeze/Tower, provides additional versatility and exercise options, either to the Reformer or independently, and allows a broader range of repertoire.

Our unique Half Cadillac can either work by attaching to our A, C and M-Series Reformers (with the right Bracket) or can be used with the Wall Unit Adapter and attach directly to your wall. Our Half Cadillacs can be bought with a Reformer, or can be added at a later date, and works with all leg height options.

As standard, our Half Cadillac comes with a Swing Through Bar, a Roll Down Bar, and our sliding eyelets, which allow multiple planes of resistance for a variety of exercises.

2024 also sees the introduction of a dedicated C-Series Half Cadillac, which is narrower, fitted for the C8-Pro Reformer, and more in-keeping with its compact design – although the larger frame of the original Half Cadillac is still an option.

- Maple Roll-Down Bar
- Aluminium Push-Through Bar with rapid-adjust height changers
- Quick-release safety strap
- 1 pair of Foot Straps
- 1 pair of handles
- 2 pairs of rapid-adjust, double-eyelet spring holders
- Spring Package: 2 × 47cm Very Light Springs, 2 × 47cm Medium Springs, 2 × 64cm Light Springs, 2 × 64cm Strong Springs

Full Cadillac

The Full Cadillac is a single frame that has two distinct options: firstly, as a Reformer/Cadillac combo (with the C8-Pro, shown above, plus appropriate brackets) – maximising the benefits of a Reformer while incorporating Cadillac functionalities – and secondly, it can function independently as a standalone Full Cadillac with our A2 Base Frame.

The next page shows our A2 Full Cadillac, which features an oversize solid bed (78cm × 206cm).

In both options, our Full Cadillac Frame gives the ease of adjustment and multiple anchor points to facilitate numerous exercises. The full stainless steel upper frame is superior to standard chromed steel frames, ensuring a long and corrosion free life. The Full Cadillac is supplied complete with all the required accessories so there are no expensive add-on purchases required.

Fuse Ladder II

Meet the Fuse Ladder II, a dynamic new piece of apparatus designed by Fuse Pilates: Washington, D.C.'s most popular Pilates studio. After extensive development in their studio, Fuse Pilates worked with Align-Pilates to create the latest version – complete with quick adjust springs, a padded backboard, and moveable eyelets.

The Fuse Ladder II appeals to students and teachers who want a functional fitness workout that's tough,

unique, and ever-changing. It is also less expensive than most Reformers or weight machines and takes up much less space, which can then be used for mat-based classes, doubling your Studio's offering.

Low ceilings won't hold you back from accessing the Fuse Ladder's total fitness and rehab potential – you can shorten our new model by up to 9 inches to bring multi-planar movement magic into even the smallest spaces.

Fuse Ladder II

Ladder Barrel RC

The Ladder Barrel RC is designed to offer fast adjustment of the barrel to make it quicker and easier to set the barrel up correctly for different sized users or exercises. To adjust the barrel, simply open the two quick-release cam levers, slide the barrel in or out, and close the levers. Like its predecessor, the RC Ladder Barrel offers industry leading levels of adjustment with 31cm of adjustability. In addition, the apparatus comes complete with 2 padded standing

boards (often sold separately for around £100) which makes it easy to get the perfect set up for all user heights.

The RC Ladder Barrel arc and dimensions have been revised and now closely match classical proportions and the 4 rungs provide different hand and foot placement options, allowing you to perform various exercises at different heights and angles.

Combo Chair III

The Combo Chair III is the latest iteration of Align-Pilates' popular Wunda Chair. Though it looks similar to its predecessor, the Combo Chair III features a number of significant enhancements to refine the smoothness and quietness of operation, taking this chair to new levels. The new features include an updated pedal locking mechanism, a revised pedal axle with roller bearings, new rubber-coated

Silent spring hooks, and a chromed Spring Tree for improved durability.

Our unique features include an easily adjustable split pedal system, allowing for independent movement of each leg or foot. Our design also has an easy accessible Spring Tree, meaning this Combo Chair can be stored and adjusted whilst against the wall.

Boxes & Arcs

Pro Sitting Box

The Align-Pilates Pro Sitting Box not only makes new exercises possible on your Pilates Reformer, but also makes seated/prone exercises more comfortable. It is suitable for use on all Pilates Reformer brands and also offers top quality finishing and the best value available in Europe.

Frame Sitting Box

The Align-Pilates Frame Sitting Box is a little smaller than our Pro & Curved Sitting Boxes, making it ideal for smaller Reformer carriages, for example the earlier C-Series, F-Series, and H-Series Reformers. The Frame Sitting Box not only makes new exercises possible on your Pilates Reformer, but it makes seated and prone exercises more comfortable.

Curved Pro Sitting Box

The Align-Pilates' Curved Pro Sitting Box features Rounded sides for Long Box exercises that aid comfort in supine position. Slightly smaller in size than our Pro Sitting Box, this gives another option that can be used on all brands of Pilates Reformers.

Head Support Box

Introducing the Head Support Box, an essential accessory designed to provide head support during various exercises using the Pro and Curved Sitting Box on the Pilates Reformer. Beyond providing support, it plays a key role in maintaining correct head alignment as it enhances posture and reduces strain, particularly for users engaging in exercises while lying on their back on the sitting box.

Modular Step Barrel & Arc

The Modular Step Barrel & Arc (also known as the 'Spine Corrector') adds extensively to the core functionality of the traditional Step Barrel, which has long been known to help improve posture by lengthening and strengthening the back, feet, and shoulder muscles. Slots conveniently over the shoulder rests of all Align-Pilates Reformers so that it can be used on the Reformer as well as the floor. The Arc is also removable, as well as locking in place, so this can be used independently.

Stacking Arc Barrel

Arc Barrels are great for adding an extra dimension to matwork classes, offering various workout possibilities that help to improve posture, lengthen, and strengthen the back, feet, and shoulder muscles.

Sock Only Studio?

Many Pilates studios are increasingly requiring their clients to wear socks in order to partake in classes. Tavi, ToeSox, and Base 33 Grip Socks not only improve hygiene, comfort, and safety on a Reformer, but also provide studio owners with an opportunity for an extra revenue stream by stocking them – giving clients an option if they come to class unprepared!

TAVI™

Initially created by instructors for instructors, it didn't take long before TAVI grip socks and apparel were seen in studios everywhere.

toeSOX®

When ToeSox created a sock with 5 toes, people asked why. Then they tried them – and they never went back to regular grip socks again.

BASE
X X X I I I

Base 33 don't follow a rule book; instead, they pay attention to how you train and create socks that support your performance.

Align-Pilates' sister company – The Mad Group – are the exclusive distributors of Tavi, ToeSox, and Base 33 in the UK. If you are interested in supplying your clients with stylish, high-performance grip socks, and other activewear, in an ever-changing range of seasonal colours, then get in touch.
